Monday 10th June 2024

Dear parents and children,

This week it is 'The Great Science Share'. Each class will be working scientifically to answer a scientific question linked to their current science unit and then 'sharing' what they have learnt in some way... Keep an eye out for posts on our 'X' page!

The theme this year is 'Sustainable science'. Simple changes can make a big difference to the environment, therefore, we are asking that over the next two weeks, you try to do something that contributes to a more sustainable world. We are asking that you then 'share' this by sending a photograph and short comment to our homework email address: homework@stpetersnewman.co.uk.

Just some ideas include... learning more about recycling and creating a poster on this, turning off lights when not in use, walking somewhere instead of driving, making a craft from an item that would otherwise go into the bin, donating old items to charity instead of throwing them into the bin, contribute to nature by planting seeds or going on a litter pick with a grown up (please consider safety aspects if picking up litter).

You can find more ideas here:

[Help me out - going green - CBBC](#)

[Top tips to get kids recycling - CBeebies - BBC](#)

Some of the photographs sent may also be 'shared' on our school science page to inspire others! Therefore, please advise on the email, if you would not like to be included on this.

All children who take part will be entered into a raffle where they have chance to win a science prize! The winners will be drawn in our celebration assembly on **Friday 21st June.**

Happy sharing!

Miss Bridges (Science Lead)
