

House dominoes

How to...

Find things around the house, such as a sock or a cup.

Help your child to find another thing that matches.

For example, another sock, an item of clothing, or something the same colour as the sock.

Find as many things as you can that match and then count them.

How many did you find?

Talk about it

- Help your child to say why the things match, for example, a hat matches a sock because they are both things you wear
- A yellow shoe matches a yellow cup because they are the same colour
- A teddy matches a sock because they are both soft.
- Help your child to use describing words like 'matching', 'same', 'different'
